

ELECTIVE DISCIPLINE SYLLABUS

Level	Course	DISCIPLINE	Type	Cr./T
GRA	EDU	Principles of Phonology and Phonemics for Literacy Professor Luiz Antonio Gomes Senna	ELEC HYBRID	2(30h)

Objetivo geral:

Development of critical mass on the conceptual nature of phonemes in metaphorical grammatical systems and their application in the study and analysis of written productions in subjects in the literacy process.

Objetivos específicos:

- Description of the vocal tract and the main areas of study in the field of speech sounds and their representation, namely: phonetics, phonology and phonemics.
- Definition of phoneme as a concept based on mental representation effort, related to notions such as “opaque x transparent phonemes” and the level of complexity in the representation process.
- Main description of vocalic and consonantal systems of Portuguese.
- Description of functional and dynamic variational aspects in the complex spectrum of phonemic classes
- Analysis of phonemic and phonological features in the origin of writing facts observable in individuals throughout the literacy process.
